Number Hunt™

ADD YOUR
WAY THROUGH
THE JUNGLE!

MATH SUCCESS... NATURALLY!

CONTENTS

- 1 game board
- 1 wooden die
- 4 game pieces

HOW TO PLAY

1. Each player chooses a game piece and places it on the start space in the top left-hand corner of the board.
2. The youngest player goes first and play continues in a clockwise fashion.
3. To get on the board, each player rolls the wooden die and moves ahead the number shown (example: If you roll a "2," move ahead 2 spaces). Remember to stay on the path at all times!
4. Now add your way through the jungle: taking turns, each player rolls the wooden die, adds that number to the number on their current space, and moves ahead that number of spaces. (example: If you were on a "2," and you rolled a "4," move forward "6" spaces). Don't forget to count the bugs or say the number printed in the space where you land!
5. If a player lands on a "Go Back..." space, he or she moves backwards the number of spaces indicated. (example: If you land on "Go Back 2 Spaces" you have to go back 2 spaces.)
6. If a player lands on "Skip a turn," he or she must wait there until their next turn.
7. The first player to land on the finish space wins! (NOTE: You do not have roll the exact amount to reach the finish space)
